

## MORE REASONS TO VISIT US

Convenient location in Mandarin.

Comprehensive audiology services available on-site.

Attending privileges at Wolfson Children's Hospital.

Most insurance plans accepted.

# Hearing Care for Kids

**Pediatric & Adolescent Otolaryngology & Audiology**

## WHAT ELSE SHOULD I KNOW?

Audiological management is essential for children who have suspected hearing loss, a history of ear infections or other ear disorders. A multi-disciplinary approach is usually considered and may include the Primary Care Provider, Otolaryngologist ("ENT") Physician, Audiologist, and Speech-Language Pathologist. These children should receive periodic hearing evaluations by a licensed audiologist even when they appear to be symptom-free. You should know that hearing assessments are required in most school districts at the onset of the school year for preschool and elementary students, and at least once during the winter months.

## PEDIATRIC OTOLARYNGOLOGIST

**Daniel L. Wohl, MD, FACS, FAAP**

- Board-certified in Otolaryngology – Head and Neck Surgery
- Fellowship- trained in Pediatric Otolaryngology
- Specializes in treatment of ear, nose, and throat disorders in children & adolescents.
- Fellow of the American Academy of Pediatrics.
- Fellow of the American College of Surgeons.

## PEDIATRIC AUDIOLOGISTS

- Masters Degree in Audiology
- Specialize in diagnostic assessment of hearing and hearing-related developmental disorders
- Graduate coursework in pediatric language development
- Active Florida Licenses
- Fellows of the American Academy of Audiology

## HEARING EVALUATIONS

A comprehensive hearing assessment can be completed at any age if there is suspicion that a hearing problem exists. Many modern methods can be used to accurately determine the hearing of a newborn, infant or child.

A case history and an otoscopic examination are essential. An audiological evaluation can help determine if a hearing loss exists in one or both ears at frequencies (pitches) that are critical to normal speech and language development, and if any identified hearing loss is conductive or sensorineural.

## NEWBORN HEARING SCREENING

Florida law mandates a hearing assessment for every newborn child. We provide initial and follow-up assessments with neurophysiological testing.

## HEARING AIDS

We offer a range of amplification devices including the new generation of digital hearing aids for infants, children and adolescents. Financing plans are available.

## EARMOLDS & SWIMPLUGS

We provide custom made earplugs in a variety of colors for your child's swimming or bathing protection.

## AUDITORY DEVELOPMENTAL & PROCESSING TESTING

**Do any of the following describe your child?**

1. Problems hearing in noise or when others are talking.
2. Confuses directions or cannot follow commands.
3. Asks speakers to repeat - says "What?" or "Huh?"
4. Problems paying attention to sounds.
5. Does not understand what is said when directly spoken to.

If you answered yes to any of these scenarios, your child may benefit from a comprehensive developmental or Auditory Processing testing assessment.
